

Gonçalo Sousa

DevOps Engineer

📍 Seixal, Portugal [in @gsousa7](#) [@gsousa7](#) [@gsousa7](#) [@gsousa7](#)

Introduction

IT professional with a background in Linux systems administration and cloud infrastructure, currently focused on DevOps practices such as automation, containerization, and observability across infrastructure and platform environments. Hard-working and curious, always keen to dig into how things work and pick up new tools along the way. Friendly and easy-going, valuing good teamwork as much as solving technical problems.

Experiences

DevOps Engineer @ **Richemont** [↗](#)

Mar. 2026 — Present

- Implemented end-to-end observability for Kubernetes workloads with OpenTelemetry, and built Datadog dashboards to monitor platform health, application performance, and key business metrics across manufacturing environments
- Managed and maintained JFrog Artifactory as the central artifact repository, ensuring reliable storage and distribution across CI/CD pipelines
- Managed and supported platforms across all Maisons running our platform, ensuring availability, compliance, and alignment with each Maison's operational requirements
- Owned incident management end-to-end via Datadog — from detection and triage through escalation to internal teams or external vendors, and stakeholder communication through to resolution
- Participated in Root Cause Analysis and Post-Mortem processes, documenting findings and driving corrective actions to improve platform reliability

- › Tracked tasks and incidents across JIRA, ServiceNow, and Confluence, keeping technical documentation current
- › Actively contributed to architectural reviews and design decisions through Agile ceremonies, driving continuous improvement across industrial manufacturing platforms

DevOps Engineer @

Sep. 2024 — Feb. 2026

AXA Group Operations [↗](#)

- › Provided Azure platform support across PaaS and IaaS, deploying and managing resources with Terraform (Terraform Enterprise) and ARM templates via Azure DevOps
- › Managed and troubleshooted Windows Server and Linux virtual machines, including a High-Performance Computing cluster (HPC Pack)
- › Automated operational processes with Bash and PowerShell, integrated into Azure DevOps pipelines
- › Reviewed Microsoft Defender for Cloud findings and implemented remediations aligned with architecture and security policy
- › Handled product support (changes, incidents, requests) through JIRA and ServiceNow, keeping technical documentation current in Confluence
- › Collaborated across Developers and L3 teams to troubleshoot and deliver specific requirements
- › Onboarded newcomers to customer infrastructure, procedures, and ticket management through hands-on knowledge transfer

Cloud Engineer @ [Timestamp](#) [↗](#)

Apr. 2022 — Sep. 2024

- › Provided Azure platform support across PaaS and IaaS, managing Windows Server and Linux virtual machines and a High-Performance Computing cluster (HPC Pack)
- › Reviewed Microsoft Defender for Cloud findings and implemented remediations aligned with architecture and security policy
- › Automated operational processes with Bash scripting
- › Handled customer support (changes, incidents, requests) across Azure DevOps, Jira, and ServiceNow, keeping technical documentation current in Confluence
- › Collaborated across Developers, L3, and Systems teams to troubleshoot and deliver specific requirements

- › Guided newcomers through customer infrastructure, procedures, and ticket management via structured knowledge transfer

Linux System Administrator @ [Timestamp](#) Sep. 2018 — Apr. 2022

- › Deployed, configured, and maintained physical and virtual infrastructure (Dell/HP/Oracle servers, Oracle Engineered Systems, Oracle Virtual Manager, Oracle Linux Virtualization Manager) across RHEL and Debian environments
- › Implemented backup and monitoring solutions using BareOS, EMC NetWorker, Oracle Secure Backup, CheckMK, Nagios, and Oracle Enterprise Manager
- › Automated infrastructure processes with Ansible and Bash scripting
- › Managed storage (LVM, NFS, Oracle ZFS Appliance), networking (firewalld, iptables), and containerization (Docker Compose)
- › Configured and maintained web services and print management with Apache HTTP Server, NGINX, and CUPS
- › Handled customer support (changes, incidents, requests) across Redmine, ServiceNow, and iTop, collaborating with Database, Middleware, and Big Data teams, and keeping documentation current in Microsoft OneNote
- › Provided 24/7 on-call support
- › Trained newcomers on customer infrastructure, procedures, and ticket handling through structured knowledge transfer

Skills

Cloud, Virtualization & Infrastructure

Microsoft Azure, Proxmox, Amazon Web Services

Containerization & Orchestration

Docker, Kubernetes, Helm, Kustomize, Istio

Automation

Ansible, Terraform

Continuous Integration & Continuous Delivery

Git, GitLab, Azure DevOps, ArgoCD, JFrog Artifactory

Monitoring & Observability

Datadog, OpenTelemetry, Prometheus, Grafana, Nagios, Checkmk

Web Servers, Proxies & Reverse Proxies

Apache HTTPD, HAProxy, NGINX, Squid

Infrastructure Services

HashiCorp Vault

Operating Systems

Linux, Debian, Red Hat Enterprise Linux

Scripting Languages

Bash, Python

Agile & Collaboration Tools

Confluence, Jira, ServiceNow

Certificates

Red Hat Certified System Administrator (RHCSA)

Jun. 2020

Credential ID: 200-086-106

Oracle Certified Associate Oracle Linux 5 and 6 System Administrator

Dec. 2019

Enterprise Open Workspace Administrator

Mar. 2022

Education

Network and Systems Administration @ ATEC [↗](#)

Jun. 2016 — Sep. 2017

EQF Level 5

Network and Systems Technician @ ATEC [🔗](#) Nov. 2013 — May 2016

EQF Level 4

Projects

Personal Homelab

- › Designed and maintained a self-hosted environment using Proxmox to host tools and resources
- › Deployed and managed services through virtual machines, containers and Kubernetes, including media management, learning resources, Pi-Hole for network-wide ad-blocking, NGINX for reverse proxy and web hosting, self-hosted GitLab for version control and CI/CD implementation, Prometheus and Grafana for monitoring and visualization, and a variety of other services
- › Automated resource provisioning and configuration using Ansible and Terraform
- › Continuously expanded and optimized the environment to integrate additional services for network management, security, media tools and development

Languages

Portuguese

Native

English

Highly proficient in speaking and writing

French

Basic knowledge
